

LOCRIAN fret board B Also known as the hypodorian mode

= Shows the root

Another quirky sound - it's a harmonic minor - 3 and $\flat 6$ -
 With the addition of $\flat 7$ th, 5th and 2nd tones. This makes it
 Somewhere, in this case between a $Bm7\flat 5\flat 9$ scale

Also $\frac{1}{2}$ diminished with the A left natural.
